Fahrenheit, and in International System is Celsius. • Dry-bulb Temperature (DB): The Dry-bulb Temperature is the temperature of air measured by a thermometer freely exposed to the air, shielded from radiation and moisture, but not necessarily from wind. • Dual Cooling System: Dual Cooling System is a cooling system that uses two different cooling methods to maintain a desired temperature. • Cooling Performance: Cooling performance is indicated by the temperature reached at the center of the freezer (at ambient temperature of 30°C with no load). In order to use the freezer at a stable temperature for a long time, it is recommended that the temperature be set to at least 5°C higher than the ambient temperature. • Water Use and Related Costs with Cooling Towers: Urbana ...
