**Introduction To Probability 2nd Edition Problem Solutions**  
Solution To Problem 1.19. Let  $A$  be the event that Alice does not find her paper in drawer I. Since the paper is in drawer I with probability  $p$ , and her search is successful with probability  $d$ , the multiplication rule yields  $P(Ac) = p d$ , so that  $P(A) = 1 - p d$ . Let  $B$  be the event that the paper is in drawer J. 2th, 2024

And Boris wins the match (probability  $p w$ ), or loses the match (probability  $1 - p w$ ). (i) Using the total probability theorem and the sequential description of Fig. 1.1(a), we have  $P(\text{Boris wins}) = p^2 w + 2p(1 - p)p$ . The term  $p^2 w$  corresponds to the win-win outcome, and the term  $2p(1 - p)p$  corresponds to the win-lose-win and the lose-win-win ... 2th, 2024

One child is a boy, that leaves three possibilities. Only one of the three is all boys, so the answer is  $\frac{1}{3}$ . (d) Since there are 3 types of families, all-boy, all-girl, and mixed, and the all-girl one can't exist given that one child is a boy, there are 2 possibilities only one of which has both boys. The answer is therefore 1 out of 2 or  $\frac{1}{2}$ . 2th, 2024
