Lattices Of (Generalized) Fuzzy Ideals In Residuated Lattices

A Characterization For Boolean Residuated Lattices (L Is A Boolean Residuated Lattice If And Only If L Is An Involution Semi- G -agebra) And They Discussed Briefly The Applications Of Their Results In Varieties Of Residuated Lattices. Finally, They Introduced The Concept Of A Fuzzy (nodal) Ideal Of A Residuated Lattice, And Gave Some Related ... Feb 10th, 2024

One-Time And Interactive Aggregate Signatures From Lattices

Parameter. We say that an algorithm is efficient if it runs in probabilistic polynomial time in the length of its input. We use $\text{poly}(\cdot)$ to denote a quantity whose value is bounded by a fixed polynomial in \cdot . Vectors and matrices. We use bold lowercase letters (e.g., $\mathbf{v}; \mathbf{w}$) to denote vectors and bold uppercase letters (e.g., $\mathbf{A}; \mathbf{B}$) to denote matrices. Feb 16th, 2024

On Ockham Algebras: Congruence Lattices And Subdirectly ...

wards, we prove the congruence lattice of Boolean based Ockham algebras is isomorphic to the lattice of a special type of ideals of the Ockham algebras. As a particular case it is proved that $\text{Con}(B_p)$ is simple for every $p > 0$, $\text{Con}(B_p, q)$ is a chain of length $q + 1$ for every $p > 0$ and $q > 0$ and we give also a complete description of $\text{Con}(B, \cdot)$. This interpretation leads, by a simple application of Mobius inversion, to polynomial identities which specialize to Hanlon's evaluation of the character-istic polynomials of generalized Dowling lattices. Analogous results are obtained for a
